

Mechanical and Electrical Engineering Services

McKee Engineering was formed in 1975 to provide mechanical and electrical consulting engineering services with the main focus on building systems. We accomplish this through thorough design, accurate and clear drawings and specifications, and knowledgeable review of construction.

We have provided engineering services to over 1,000 clients where we have developed and extended our skills to include a wide variety of projects including Developers, Institutional (Hospitals, Schools, Post Secondary Institutions), Tenant Fit-Up, High Technology, Industrial, Government, Commercial, and Residential.

McKee Engineering employs thirty-seven people. Low turnover has provided us the in-house capacity to handle projects of all sizes and has led to the development of knowledgeable and reliable employees. *We have developed team determination to be the best, providing our clients with the quality of service they deserve.*

Our goal is to be the Mechanical and Electrical engineering firm of choice, providing exceptional service to each client.
